# SECURITY PRODUCTS

Unique locking hardware for a variety of security applications including custom gates and doors.

## 2 EASY STEPS TO FIND THE LOCK HANDING

For some of our locks, we offer a right-handed or a left-handed version and the lock handing you choose depends on whether your gate is right or left-hand hung.

### IMPORTANT-Read Before Purchasing a Lock!

#### LEFT HANDED LOCK

#### RIGHT HANDED LOCK

**Step 1:** Look at your gate from the outside (secure side) or visualize it if the gate is yet to be installed.

**Step 2:** The side that your hinges are on equals the lock handing. For example, if your gate hinges are on the right, you will need a right-hand lock (and vice versa).
